EQUIPMENT CORNER

A bulldozer is a crawler (continuous tracked tractor) equipped with a metal plate known as a blade used to push large quantities of soil, sand, rubble or other materials during construction. Bulldozers are often large and powerful. Bulldozers are often used in road building, construction, mining, forestry, land clearing and any other projects requiring highly mobile, powerful and stable earth-moving equipment.

TOOL COUNTING

Count
and write
how many
there are.
